Login :

The screenshot shows a web browser at localhost:3000 displaying the Doctor Finder application. The application has a purple header with a medical icon and the text "Doctor Finder". Below the header are two tabs: "DOCTORS" and "APPOINTMENT". The "APPOINTMENT" tab is active. A modal titled "Authentication" is open, showing a "LOGIN" form. The form has two tabs: "LOGIN" (selected) and "REGISTER". The "LOGIN" form contains two input fields: "Email *" with the value "TestUser@TestUser.com" and "Password *" with masked characters "*****". Below the input fields is a blue "LOGIN" button.

The screenshot shows the same Doctor Finder application, but now with two doctor profiles visible on the left. The "Authentication" modal is still open, but it now displays a "Login Successful." message above the "LOGIN" button. The doctor profiles are:

- Dr. Hermione Kelley**
Date: 2023-3-10
Symptoms: Cold, Cough
priorMedicalHistory: No Medical History
A blue "RATE APPOINTMENT" button is below the profile.
- Dr. Kennan Hess**
Date: 2023-9-3
Symptoms: cold
priorMedicalHistory: none
A blue "RATE APPOINTMENT" button is below the profile.

The "Authentication" modal remains in the center, showing the "LOGIN" form with the same email and password fields, and the "Login Successful." message.
